

Zero-Waste Bathroom

REDUCE, REFILL, RECYCLE

Recycle bottles and containers

Put empty shampoo, lotion, soap, and cleaner bottles in your blue recycling bin. Find the recycling symbol and number on the bottom of your plastic bottle and check your local requirements to make sure they accept it.

DIY cleaners

Make low-cost, non-toxic cleaning solutions with zero waste using citrus peels, baking soda, and vinegar and avoid single-use packaging altogether.

Choose refillable or solid form products

Refill the same container for less waste, more savings. Check for stores with bulk bins that have shampoo, soap, and other options. Buy soap or shampoo bars and toothpaste tablets to reduce packaging waste.

Swap disposables for reusables

Choose washable cloths, safety razors, and reusable cotton rounds to prevent single-use waste.
